Skills

JavaScript • React • Tailwind CSS • Express.js • Redux • Node.js • MongoDB
HTML • CSS • Postman • Git • Grid • Flexbox • DaisyUI • Sanity • Firebase

Projects

GitHub Finder App

- Built with React, GitHub REST API, Tailwind CSS and DaisyUI.
- Search for users on GitHub and check out their latest ten repositories.
- Latests commits and more repo info are shown in each repo card item.
- Application is deployed on Netlify at <https://jonathons-github-finder.netlify.app>.

House Marketplace

- Built with React on the front end and Firebase as the database to store all listings and users.
- Create an account and list your home to sell or rent! Explore current listings and offers available today.
- App includes Google OAuth and private routing to verify user is logged in.
- Application is deployed on Netlify at <https://jonathons-house-marketplace.netlify.app>.

MERN Support Desk

- Built with MongoDB, Express.js, React, Redux, and Node.js, this app allows users to create and close tickets.
- Create an account and list your home to sell or rent! Explore current listings and offers available today.
- App includes Google OAuth and private routing to verify user is logged in.
- View repository on GitHub: <https://github.com/JonathonCisneros/MERN-support-desk-app>

Work Experience

American Coast Title

Title Support Specialist

Lake Forest, CA

October 2021 - July 2022

- Prepared deeds to change title of property ownership upon request of the borrower(s).
- Reviewed trust certifications for properties vested in trusts.
- Contacted borrowers when necessary documentation was needed to prepare change of title.

Recording Specialist

January 2021 - October 2021

- Reviewed Deed of Trusts and deeds to ensure borrowers' loan and property information were all correct.
- Recorded Deed of Trusts and other necessary documents with California counties via Simplifile.
- Escalated corrections and redraws for any incomplete or erroneously completed documents.
